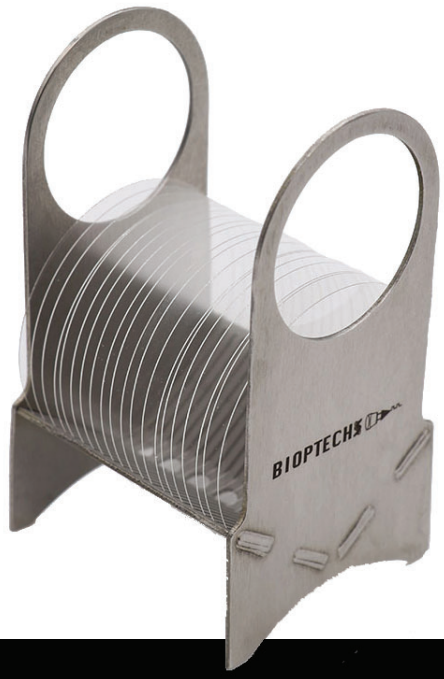
40mm Coverslip Holder

Part no. 40-1313-0319-0418

Whether you are looking to sterilize, pre-treat, or stain batches of coverslips, the stainless steel 40mm coverslip dipping rack has you covered. Made of high-quality stainless steel it is fully autoclavable and fit for use in many harsh chemical processes, including strong acids, strong bases, alcohols, organic solvents, and salts. Designed to fit into 250ml beaker.



Perfect for:

- Batch sterilizing coverslips using ethanol washes
- Pre-treat coverslips with harsh chemicals
- Bulk equilibrate coverslips
- Stain samples on 40mm coverslips

Key Features

Fully autoclavable components and reusable
Stainless steel components are designed for easy autoclaving and sterility. Safe for use with harsh chemicals.

Efficient ergonomic design
Easy to use and prepare. Heavy enough to sink into solution, light enough to remain manageable. Thoughtful spacing to eliminate contact between coverslips.

Capacity of coverslips (40mm Ø)	20
Height	74mm / 2.9”
Width	40mm / 1.6”
Length	44mm / 1.7”
Material	316 Stainless Steel
Beaker volume size	250ml
